PHOS 25 LT is equipped with the latest LED technology and is passively cooled without a fan. This budget-priced entry level model can flexibly be attached to 3-circuit lighting tracks. For its 22 watts High-Power LED we recommend a projection distance of 10 feet in normal room lighting. The projector is particularly suitable for use in smaller shops, doctors' offices and chemist's shops, where an operation with low heat emission is essential. The projection motif (gobo) can be changed without tools.

Components

Standard series with high power LED and 85 mm standard lens. The machine is ready to plug in and run. Required accessories: glass gobo with individually designed motif.
